—One of the pledges made by Congressman Fulkerson during his campaign was that he would endeavor to secure better rural delivery for this congressional district. This pledge has been redeemed to its fullest extent. When he went into office not one of the counties had complete county delivery. Now all have, making a total of 159 routes in the district. The last county to be given complete service was Atchison, when the delivery began last May. There are now a total of 1,824 routes in the state. The total expended by the department on account of the rural mail service for the year ending June 30, 1906, was \$24,239,452.

—The Columbia (Mo) Herald referring to the Sabbath Day as a political issue in Missouri editorially says: "We did not expect to see the day when the Sabbath would be a political day in Missouri. That day, however, has come. The Democratic party stands for the enforcement of the law which preserves the Sabbath as a day of rest. More, the Democratic party goes farther and endorses the law itself." And the Kansas City court of appeals says: the ordinances of St. Joseph, which permits the saloons of that city to be opened and do business on Sunday, is superior to the state law. Things have changed a little; it is now the State of St. Joseph and the Town of Missouri.

Nearly every week we are asked how a subscriber shall proceed to get this or that paper discontinued. The proper way is to pay all you owe on the paper and tell the publisher that you wish to stop taking his paper. Then if it does not stop coming to you, mark "refused" on the margin near your name and hand it back to the postmaster, whose duty it is to make a record of it and notify the publisher. No honest publisher will try to force his paper on any one who does not want it, and should discontinue it if all back subscriptions have been paid. It has been decided by the courts that a publisher can collect for a paper as long as it is taken out of the postoffice, but when the patron refuses it he is not liable for payment after the date of refusal, but he is liable up to that date. —Some of our exchanges have made mention of the fact that the farmers living along the lines of rural routes have contributed a bushel or so of corn to the carrier. This is a suggestion that might well be acted upon by the patrons of every rural route. The carriers have a government job, but it is by no means a "private snap." It takes a good deal of management to make both ends meet when they are obliged to keep two horses, live in town and buy all the necessary provisions at the market price. The carriers of our county have gone over their routes in all kinds of weather at a great inconvenience, and they are always faithful in the performance of their duties. A bushel of corn or so given to the carrier would hardly be missed by the farmer, but it would be a great saving in the expense of horse feed, and the generous act would be appreciated by the faithful mail man.—Jeffersonian.
